Re: Pool 1 Water

In February, the District notified you that the Bureau of Reclamation has declared us Critical under the Exchange Contract. In order to meet the needs of our Class 1 growers, an application was sent out for Supplemental Pool 1 (Purchased Well Water) for any grower to request water in addition to their Tier 1 and Tier 2 allocation. The District recognizes the level of uncertainty the growers faced developing their total water need early in the year. As such, another round of Supplemental Pool 1 water is being offered. The District will review the applications and prorate the supply with the demand. Please submit your application by June 21, 2021. The cost of the water remains at \$95/acre-foot.

Attached is a supplemental water application form and after the deadline of June 21, 2021, the District will contact those who have made requests and inform them if and how much water will be available. **This water is not available to Class 2 lands.**
