CENTRAL CALIFORNIA IRRIGATION DISTRICT
2022 WATER SUPPLY INFORMATION – January 20, 2022

The Bureau of Reclamation will not make an official allocation for CCID and the Exchange Contractors until the middle of February 2022. The District's Board of Directors has adopted a budget and water rate schedule based on a Critical Year water supply under the Exchange Contract to start this year. Our target Shasta inflow is 4 MAF this year. The current forecast is on the fringe between a Critical and Non-Critical designation. The unusually dry January is expected to reduce the forecast and we anticipate our initial allocation from Reclamation to be Critical. ***The quantities and rates shown below for the tiered pricing levels are subject to change.*** The District will provide updates immediately if conditions change.

IN-DISTRICT WATER SALES

a. **A 2-tiered rate schedule will apply to all water used from February 1 through December 31**:

   Tier 1 – 0 – 2.5 acre-feet/gross acre – $20.00 /acre-foot

   Tier 2 – 2.51 – 3.0 acre-feet/gross acre (CCID Well Water) – $50.00 /acre-foot

b. The per-acre quantities above represent how much water will be available, if needed, but the amounts are not guaranteed. The actual amount of water available is subject to the Bureau's ability to deliver water to us, and limitations in the Exchange Contract.

c. The Board will update the allocation and water rates if we are given a non-critical allocation from the Bureau of Reclamation

DEVELOPED WATER – CLASS II LANDS

There will be no District water available for Class II lands at this time. We will, however, transport private well water for those who have access to wells that can be pumped into our canals. The water will be subject to a $2.00 per acre-foot transportation/administrative charge, and a loss factor related to the field's distance from a well source.

PLANNING

CCID will update you as soon as we receive the allocation and will notify you of any changes throughout the irrigation season immediately. **Each individual water user must weigh the information as we know it today, make their individual risk assessment and decide on when and how much to plant and irrigate prior the Bureau's official announcement.**

In addition, out of respect for our consumers and employees, the District is offering crop reports to be signed using the virtual DocuSign platform again this year. Although this is our preferred approach, our historic methods of signing crop reports are still available.

If you have any questions, please call the CCID Office at (209) 826-1421.
