WATER SUPPLY UPDATE

On April 7th, 2022, we notified you that the record-breaking dry January through March has created significant uncertainty for our water operations this year. Due to the dry weather patterns and impending regulatory restrictions on Delta pumping we needed to shift some demand to later in the year. While the drought continues to challenge operations, we have experienced significant precipitation in April which has positively impacted projected pumping in the Delta and our overall water supply.

We are pleased to inform you that effective immediately, **CCID is adjusting our allocation back to an effective allocation January 1st through December 31st.**

Tier 1 – 2.5 acre-feet/gross acre - \$ 20/acre-foot

Tier 2 – 0.5 acre-feet/gross acre - \$ 50/acre-foot

SUPPLEMENTAL POOL WATER

Please contact the office if you have any questions about the supplemental water you have already purchased based on the previous water supply restrictions. Submit a request for supplemental water if you are still in need.

UPDATES

Additional updates will be sent out as frequently as necessary to make sure you have the most up to date information so you can plan your operations accordingly. You will need to remain in close coordination with your canal worker to pick up water as it becomes available. As always feel free to contact the office if you have any questions at (209) 826-1421.

Cordially,

Jarrett Martin
General Manager
